If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Helot, et al. (US Patent Application Publication No. 2002/0169675). Helot discloses a method for ordering consumer items that enables product configuration and market research that includes software which enables a user to select the features of a product configuration, and display and update a total price value of the product in accordance with price values of selected features. Helot further discloses the collection of statistical data regarding the user's selections for the purposes of market research, and that several of the program modules may be located on the client instead of the server.

However, regarding independent claims 25 and 42, Helot taken either individually or in combination with the other prior art of record fails to teach or suggest a method, as claimed, for configuring hypothetical products that are not being offered for sale.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Palmer, et al. (US Patent Application Publication No. 2002/0107763) discloses a web based system and method for configuring and determining availability of configurable products.
- Palmer, et al. (US Patent Application Publication No. 2002/0073001) discloses a system and process for assisting a user to configure a configurable product.
- Elmer, et al. (US Patent Application Publication No. 20020004739) discloses Internet adaptive discrete choice modeling.
- Weller, et al. (US Patent No. 7,107,224) discloses a value driven integrated build-to-buy decision analysis system and method.
- Smirnov (US Patent No. 7,188,075) discloses extended product configuration techniques.
- Thompson, et al. (US Patent No. 6,810,401) discloses an automated configuration system and method.
